SUMMARY

Senior DevOps and Cloud engineer with 7 years of experience designing automated, observable infrastructure on AWS and Kubernetes. Track record of cutting deploy times, reducing cloud spend, and building self-service platforms that scale engineering teams without scaling platform headcount.

EXPERIENCE

Senior DevOps Engineer

2023 — Present

Nimbus Systems

- Designed and shipped a self-service multi-tenant EKS platform used by 14 product teams.
- Cut platform provisioning time from 3 days to under 20 minutes with GitOps-based workflows.
- Reduced compute spend 34% through Karpenter consolidation and spot-friendly scheduling.

Cloud Infrastructure Engineer

2021 — 2023

Harborline

- Migrated a monolithic application from bare metal to AWS with zero customer-facing downtime.
- Reduced deploy time from hours to minutes with a standardized CI/CD pipeline.

Site Reliability Engineer

2019 — 2021

Fetchpoint

- Built the organization's first unified observability stack (Prometheus, Loki, Grafana).
- Redesigned on-call rotation and SLO-based alerting, cutting average weekly pages by 80%.

Systems Administrator

2017 — 2019

Vantage Retail

- Managed configuration and patching for a 300-node Linux fleet using Ansible.
- Cut new-host provisioning time from a full day to nine minutes.

SKILLS

Kubernetes · Terraform · AWS · GCP · Docker · ArgoCD · GitHub Actions · Prometheus · Grafana · Ansible · Helm · Linux
· Python · Bash · Vault

EDUCATION

B.Sc. Computer Science — Technical University of Berlin, 2017

CERTIFICATIONS

AWS Solutions Architect & DevOps Engineer (Professional) · Certified Kubernetes Administrator & Security Specialist · HashiCorp Terraform & Vault Associate · Google Cloud Professional DevOps Engineer.
